AI Agent Category Request

An AI agent is an autonomous software program that can perceive its environment, reason about it, and take actions to achieve specific goals autonomously.

Does your solution offer AI Agent capabilities? *

☒ Yes

☐ No

How is your AI agent built? *

☐ Using Vertex AI Agent Framework

☐ Using third-party frameworks, such as Langchain or Crew.ai

☒ Self-hosted AI agent solution running on Google Cloud (GKE/K8/VM)

☐ ISV/Partner-hosted AI solution running on Google Cloud

Please provide a description of your AI Agent functions. *

PMOMax is an AI agent system that ingests unstructured inputs (documents, spreadsheets, notes) and autonomously converts them into a structured Project Initiation Document (PID). It uses multiple context-aware agents to extract data, generate and refine project sections (objectives, risks, timelines), maintain state across the workflow, and produce actionable outputs including Gantt charts and exportable reports.

Thanks for your response!

We will be in touch with you if your product is approved to be added to the category.
